

AB-900: Copilot & Agent Administration Fundamentals

Practice Questions

Candidate Instructions

- Select the best answer for each question.
- Some questions may require selecting more than one answer.
- Answers are provided at the end of this document.

Question 1 – Zero Trust Security

A company is designing its cybersecurity strategy using the Zero Trust model.

Which **three** core principles should guide their implementation? (Select three.)

© 2026 Beexam. All rights reserved.

- A. Trust by default – devices and users inside the network are automatically trusted
 - B. Verify explicitly – authenticate and authorise every request using device and user signals
 - C. Assume breach – segment access and minimise potential damage if a breach occurs
 - D. Use least privilege – grant only the access necessary using Just-In-Time and Just-Enough-Access
-

Question 2 – Microsoft 365 Copilot Licensing

A company plans to enable Microsoft 365 Copilot for its information workers. The organisation uses a mix of Microsoft 365 E3 and Office 365 E3 licences.

What is the **minimum licensing action** required to enable Copilot for all users?

- A. Upgrade all Office 365 E3 licences to Microsoft 365 E5
 - B. Purchase the Microsoft 365 Copilot add-on licence for all users
 - C. Replace all licences with Microsoft 365 Business Premium
 - D. Purchase the Copilot add-on only for Microsoft 365 E3 users
-

Question 3 – Microsoft Defender XDR

A phishing email is detected and contained. The security team needs a single view that shows the incident timeline, related alerts across email and endpoints, and recommendations to improve security posture.

Which Microsoft capability provides this experience?

- A. Microsoft Defender for Identity
 - B. Microsoft Defender for Office 365
 - C. Microsoft Defender Vulnerability Management
 - D. Incidents and Alerts with Secure Score in the Microsoft Defender portal
-

Question 4 – Custom Domain Management

An administrator acquires a new domain and wants to use it for user sign-ins and email addresses in Microsoft 365.

Where should the administrator add and configure the domain?

© 2026 Beexam. All rights reserved.

- A. Settings > Org settings > Services
 - B. Billing > Licences
 - C. Resources > Sites
 - D. Settings > Domains
-

Question 5 – Zero Trust Deployment Actions

An organisation is implementing Microsoft's Zero Trust security model.

Which **four** actions align with Microsoft-recommended Zero Trust swim lanes? (Select four.)

- A. Enrol devices in Microsoft Intune and apply compliance policies
 - B. Deploy Microsoft Purview Information Protection
 - C. Provide all users with permanent Global Administrator access
 - D. Pilot Microsoft Defender XDR
 - E. Monitor AI app data access using Purview DSPM
 - F. Disable Conditional Access policies
-

Question 6 – Threat Protection Intelligence

An engineer reviews Microsoft 365 security features related to threat intelligence.

Which **four** capabilities are included? (Select four.)

- A. Automated investigation and response
 - B. Threat hunting using advanced queries
 - C. Real-time encryption of all outbound emails
 - D. Alerts for suspicious or malicious activity
 - E. Microsoft Intelligent Security Graph
 - F. Sensitivity labels for files and emails
-

Question 7 – Identity Security

An organisation wants to require users to verify their identity using more than one method when signing in.

Which feature provides this protection?

© 2026 Beexam. All rights reserved.

- A. Self-Service Password Reset (SSPR)
 - B. Multi-Factor Authentication (MFA)
 - C. Conditional Access
 - D. Smart Lockout
-

Question 8 – Protecting Sensitive Documents

A company needs to ensure that financial documents are encrypted and accessible only by authorised users.

Which Microsoft Purview feature should be used?

- A. Data Loss Prevention (DLP)
 - B. Sensitivity labels
 - C. Communication Compliance
 - D. Insider Risk Management
-

Question 9 – Automated Access and Licensing

An administrator must manage SharePoint access and Copilot licence assignment for a frequently changing HR team.

Which Microsoft Entra object is the most efficient choice?

- A. Dynamic Security Group
 - B. Mail-enabled Security Group
 - C. Microsoft 365 Group
 - D. Distribution List
-

Question 10 – Troubleshooting Sign-In Failures

A user cannot sign in, and the administrator suspects Conditional Access is blocking access.

Which **two** tools should the administrator use first? (Select two.)

- A. Sign-in logs
- B. Conditional Access What If tool
- C. Microsoft 365 Service Health dashboard
- D. Exchange Online Message Trace

Question 11 – Copilot Data Access

A user asks Microsoft 365 Copilot to summarise a SharePoint document they do not have permission to access.

Why does Copilot return no results?

- A. Copilot performs additional Zero Trust checks
 - B. Copilot only accesses labelled content
 - C. Copilot follows existing Microsoft 365 permissions
 - D. Microsoft Purview DLP redacts the content
-
-

Answer Key

Question	Correct Answer(s)
1	B, C, D
2	B
3	D
4	D
5	A, B, D, E
6	A, B, D, E
7	B
8	B
9	A
10	A, B
11	C
